

Hello iGEM teams from all around the world. We as AUC_TURKEY would like to greet you all.

With the university teams also starting their iGEM period of the year, we wanted to inform all the teams.

We formed an act called iGEMism, an act which aims to inform people about iGEM, acknowledge people about synthetic biology and remove the doubts of people on genetic engineering through making iGEM fun and entertaining. As some of you may know, we have also formed an iGEMism Twitter page which we try post as much as we can. The thing we aim to make with the iGEMism Twitter page is a social platform where all iGEM teams can post, as previously mentioned, their fun entertaining “iGEMist” comments. Follow us and feel free to leave those @iGEMism ‘s.

Also we prepared a survey that we plan to spread around as much as possible. We already have done the survey to 400 people. What we want is to collaborate with you, for you to do also conduct the survey. If this collaboration could be done we would be glad.

Thank you for reading with patience. Salutions from AUC_TURKEY!
